Renew Your Skin Through
Advanced Exosome Science

Breakthrough Science. Brighter Eyes

As skin ages, its natural renewal process slows, leading to visible signs of aging. For years, skincare has relied on the same ingredients—hydrators, exfoliants, and chemical treatments. (plated)™ Skin Science is revolutionizing skincare. As the first and only brand harnessing the power of platelet-derived exosomes, we're redefining what's possible for aging skin, supporting its natural renewal process for beauty that radiates from within.

#1 EXOSOME
SKINCARE BRAND*

Proven Results

In a consumer study, users experienced the following visible improvements:

Patient reported outcomes, ages 30-60, Fitzpatrick I-VI
*in the U.S. based on 2024 Guidepoint market share data

Rewind the Clock

Your eyes do a lot—shouldn't your skincare keep up? The delicate skin around them is thinner, more exposed, and one of the first places to show signs of aging—like crepey, crinkled, dull skin.

Now for the good news...

(plated)™ EYE Serum is a powerful at-home treatment designed to visibly firm, smooth, and brighten. Backed by 15 years of research, platelet-derived exosomes work to:

- Reprogram the look of aging eyes
- Support collagen and elastin
- Deliver targeted nutrients for renewal

Brighter, younger-looking eyes—powered by science.

Our nutrient rich formula helps with:

- Fine Lines and Wrinkles
- Puffiness
- Crepey Skin
- Dark Circles
