STEEL-EDGE
DOORS

Timbergrain doors have 4" of engineered lumber on both the hinge and latch edges to keep the door straight and tight against the weatherstripping.

Polyurethane foam core fills every void to protect from heat loss or gain – five times more efficient than a wood door.

Steel-edge ensures a door will not rot, bow or warp, even under extreme conditions.

Trilennium® Multi-Point Locking System

Reliable Security

Operating as one, all three bolts engage when the door is closed. One movement of the thumb turn or key activates all three deadbolts. When activated, each bolt becomes a deadbolt that cannot be compromised.

Peace of Mind

Delivers the strength of one solid locking unit combined with the protection of three deadbolts.

Panic Release

A single downward turn of the interior handle releases all three of the deadbolts.

Forgiving When Installed

You can't control the rough opening, or what happens over time, Trilennium can correct door misalignment up to 3/16", so it works when others don't.
