

IN 2015, LIBERTY MUTUAL INSURANCE REQUIRED A HIGH VOLUME, FLEXIBLE SOLUTION TO HOUSE THEIR CUSTOMER RECORDS, CLAIMS, POLICIES AND OTHER VALUABLE INFORMATION.

The Challenge

As a leader in the insurance industry, Liberty Mutual wanted to reduce their data footprint and completely eliminate data centers in their organization within the next 7-10 years by moving to a public cloud solution. Their vision was to deliver modern cloud-based solutions that would enable paperless operations around the world.

Liberty Mutual has numerous vendor repositories, such as Documentum, Sharepoint, CMOD and Alfresco. They also have an initiative to completely retire Documentum. Leadership at Liberty Mutual forecasted significant cost savings and security improvements by moving their content to the cloud. They chose Amazon Web Services (AWS) Nebula, which claims companies moving to their cloud solution will save a minimum of 30% of current infrastructure spend.

The Solution

After extensive research, Liberty Mutual chose Simflofy to ensure they could move to the cloud quickly in order to remain competitive against newer businesses that do not have legacy systems and began their businesses with cloud based services.

With 60+ out-of-the-box connectors, Liberty Mutual is able to take on just about any migration project using Simflofy.

Liberty Mutual.
INSURANCE

Liberty Mutual Insurance is a diversified global insurer and the second largest property and casualty insurer in the U.S.

With over 50,000 employees, 900 offices worldwide and 40 billion records.

WITH ADDITIONAL SAVINGS ON INFRASTRUCTURE SPEND .. LIBERTY MUTUAL IS ABLE TO REINVEST ITS SAVINGS INTO NEW DEVELOPMENT INITIATIVES RATHER THAN ONGOING MAINTENANCE COSTS.

Results

Global Risk Solutions (GRS) was the first business unit to use Simflofy for its migration efforts. After a successful partnership over several years, Global Retail Markets (GRM) began using Simflofy for migration projects in the U.S., Europe and Latin America. Today, both GRS and GRM continue to use Simflofy to migrate off legacy systems, such as Documentum and Sharepoint. Combined, upwards of two billion documents have been migrated to date. Some examples of content being migrated include: bill images, policies and claims. MS word documents, PDFs, JPGs, video files, and audio files.

Liberty Mutual is continuing to gain even greater control over archival, distribution, access and integration of all of the content in their company. Their end-user community can access their information with complete transparency.

Leveraging Simflofy's Platform and Premier Support, Liberty Mutual is able to get over hurdles more quickly, saving the company implementation time and costs. With additional savings on infrastructure spend (computing and storage costs), as well as reducing employee overtime, Liberty Mutual is able to reinvest its savings into new development initiatives rather than ongoing maintenance costs.

With Simflofy's release of Version 3, Liberty Mutual will have improved performance and they are beginning to explore new ways to benefit from Simflofy in areas, such as Federation, eDiscovery and Records Management.
