

ON POINT HEMP OIL TINCTURE

On Point is a high-quality equine product that supports focus in competition and training, while reducing nervousness resulting in better communication between horse and rider.

Energize the mind and body with the perfect balance of natural ingredients to help your horse compete with intention and focus.

HORSE PELLETS, RE-IMAGINED

Our new On Point Tincture now offers an easy-to-use dropper and faster activation time in a more convenient size than our previous On Point Pellets. This new tincture is the same product you have loved for years, re-imagined and precisely designed. Sat-A-Vet™ On Point is formulated with all-natural ingredients to maximize the effectiveness of the highest quality CBD from hemp extract for performance, training, and well-being.

SAT-A-VET™ PET TINCTURES

Sat-A-Vet™ hemp oil products for pets, help maintain normal disposition and emotional balance as a daily use product for your pets every day wellness. While helping to reduce the effects of normal environmental stress, our oil tincture may help curb their destructive behavior by promoting a calming effect and relaxation. Sat-A-Vet™ for pets and On Point for Equine are also for training and performance support for exercising muscle. Sat-A-Vet™ Supports normal physical and mental performance as well as normal recovery time after strenuous activity. Our newly released Rebound Salve is great for topical use as a wound care for pets and larger farm animals.

All Sat-A-Vet™ products are 2018 US Farm Bill and USDA compliant, tracked from seed to sale. Hemp is made up of many active compounds. It is theorized that there is a synergistic effect between these chemicals that

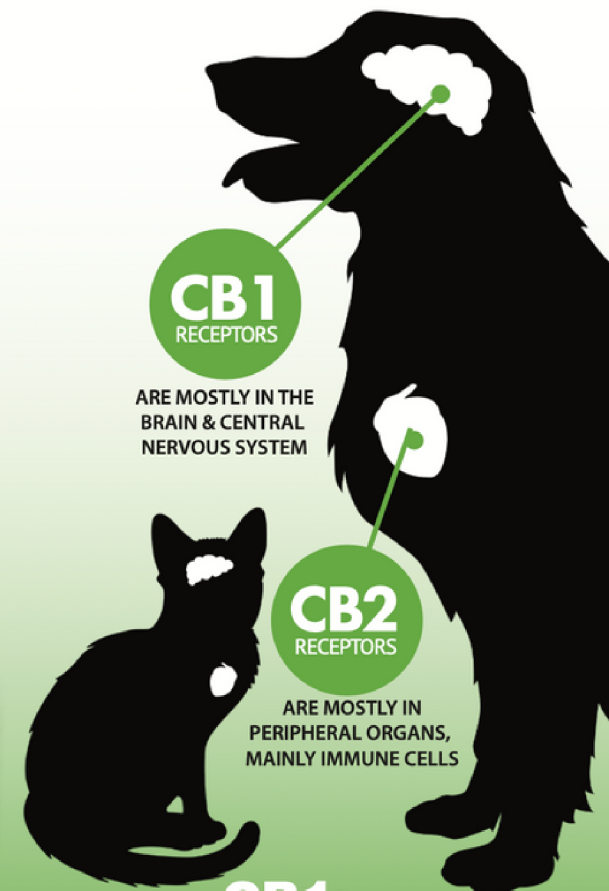

ultimately is greater than the sum of its parts. This phenomenon, known as the "entourage effect", is one of many reasons Sat-A-Vet™ is formulated with a broad spectrum of cannabinoids including CBD and CBG, along with hemp derived terpenes and flavonoids to achieve maximum effectiveness for your pet. The proprietary extraction gently removes all detectable THC so your pet gets the benefits of the hemp without the high. For quality assurance, every Sat-A-Vet™ product is QR coded so you can easily verify potency from a third-party laboratory.
