*What's Trending...* Spring—it's in the air, it's on our mind and soon enough it will be the inspiration in our kitchens! With the spring equinox and daylight savings just behind us days are longer, temperatures will be warmer and our meals very likely will be a tad lighter. Fresh fruits, vegetables and herbs from the garden will be back. As we move into spring and summer we see simple meals with fresh ingredients. Food doesn't have to be complicated to be flavorful and satisfying. Look for recipes (or create your own) with minimal ingredients and keep it as fresh as possible. Soups, salads, scrambles and sautees - all great go to options that can be both surprisingly simply and healthy .

Our next team tasteful is the lovely Cherie Sutton! Cherie is in her 17th year here at Tasteful and works as our Operations Manager extraordinaire. She says that it's hard to pick one favorite tasteful dish but some of her favorites include our chicken salad, jalapeno popper dip, and chili rubbed chicken. She loves to train employees, organize, and create beautiful displays during her time here, and we must say she does a great job!! In her spare time, Cherie enjoys antiquing with her husband Bob, and spending time with her kids and their wives as well as her beloved grand dogs. An interesting fact about Cherie is that shes only had her license for 4 years and her car is adorable! We love you for everything you do and the person you are Cherie
