**BOOTH, Tyler**  
**5182 Ridge Road, Lkpt**  
**Rezoning to PD**

**PRZ-2025-001**  
**SBL#79.00-2-19.12**

Chairman Amacher explained that this is a referral from the Town Board for all 5 acres of property. This is a new process which will take a minimum of three months to complete.

**Proposal:** Rezoning of approximately 5.23 acres to establish a Planned Development District (PDD) for the continued use and future expansion of a historic tavern, museum, educational facilities, and related cultural uses.

Mr. Booth explained that the application represents a conceptual, long-term master plan for the property, with phased development anticipated over a period of several years. Chairman Amacher and Mr. Booth discussed that the current proposal does not involve immediate large-scale construction and that any future improvements would be subject to site plan review and further approvals.

### Historic and Archaeological Considerations

The Chairman noted the presence of a cemetery on the property and asked for clarification regarding its extent and maintenance. Mr. Booth stated that:

- Approximately eight marked headstones are currently known
- The full extent of the burial area has not yet been confirmed
- All known burials are believed to be associated with the original family connected to the property
- Historical records are incomplete, and further archaeological investigation may be required

**Time:** 6:00 PM

**Location:** Town Hall Meeting Room, 4160 Upper Mountain Road, Sanborn, New York

---

Mr. Booth confirmed that the cemetery is shown generally on existing plans and agreed that all future submissions would clearly identify the cemetery location and ensure its preservation.

The Board discussed correspondence from the New York State Office of Parks, Recreation and Historic Preservation (SHPO). Mr. Booth stated that SHPO has required archaeological review, including phased investigations, prior to any ground-disturbing activities. No objections to the rezoning itself were noted in SHPO's correspondence.

### **Site Access, Parking, and Traffic**

The Board reviewed existing and proposed site access points. Mr. Booth stated that:

- The property currently has a U-shaped driveway with separate entrance and exit points
- A previously proposed additional access point was denied by the New York State Department of Transportation
- Parking is currently provided in both paved and grass overflow areas

Future plans include formalizing overflow parking areas, potentially with gravel surfaces, subject to site plan approval.

### **Stormwater and Utilities**

Board members raised questions regarding stormwater drainage and discharge. Mr. Booth stated that:

- The property is located at a low point in the surrounding area and currently receives runoff from adjacent properties and roadway drainage
- Stormwater is managed on site
- Any future development would include detailed stormwater management plans prepared in accordance with Town and State requirements

The Board noted that these issues would be addressed in greater detail during site plan review and as part of the SEQRA process.

### **Density, Buildings, and Planned Development District**

Discussion focused on how the Planned Development District would allow flexibility in building placement and density. It was noted that:

- A PDD allows the Town Board to establish site-specific zoning standards

**Date:** January 26, 2026

**Time:** 6:00 PM

**Location:** Town Hall Meeting Room, 4160 Upper Mountain Road, Sanborn, New York

---

- Existing nonconformities could be addressed through the PDD framework
- Any new construction would require site plan approval

Mr. Booth stated that the current five-year outlook includes limited construction, primarily involving restoration and expansion of the kitchen wing of the tavern.

## **Events and Operations**

The Board discussed event capacity and operational impacts. Mr. Booth stated that:

- Larger events are anticipated to draw approximately 50–100 attendees
- Events are primarily educational and cultural in nature
- The property is operated by a nonprofit educational corporation

Financial projections included in the application were discussed. Mr. Booth stated that anticipated revenues would be used for property preservation, maintenance, and long-term sustainability of the museum and historic site.

## **Environmental Review and Process**

The Board reviewed the procedural steps required for the application, including:

- Coordinated SEQRA review
- Referrals to Niagara County Planning Board and neighboring municipalities
- Subsequent Town Board consideration of the rezoning
- Future site plan review by the Planning Board if the rezoning is approved

The applicant acknowledged understanding of the process and anticipated timeline.

## **Board Comments**

Board members expressed that the proposal appeared consistent with long-term preservation and cultural use of the property, noting that no final approval was being granted at this stage, and that detailed impacts would be reviewed during future phases.

## **Motions and Actions**
