Levels of Coverage

Health plans are offered in a tiered format based on four metal levels that match the percentage of costs covered. As the metal level goes down, the monthly premium goes down while the member's out-of-pocket cost share goes up.

MVP Premier Plans (Standard)

Plans are based on the same plan designs that every health insurer must offer. Standard plans are designed by the State and the benefit details do not vary from one carrier to the next.

MVP Premier Plus Plans (Non-Standard)

Plans contain unique features that enhance the value of the benchmark benefits offered in the Standard plan designs, such as lowering the member cost-sharing for the most common health care needs.

Aggregate (Agg) For any policy with two or more members, the deductible must be met by any one or any combination of members before the plan will make payments.

Embedded (Emb) Each member will pay toward, but never exceed, their individual deductible and/or OOPM until the larger Family deductible and/or OOPM is met. Once the Family deductible and/or OOPM has been met, the plan will begin payment of services for all members on the contract, regardless of the status of any remaining individual deductible and/or OOPM levels.
